MOULT

»MOULTING

- T-TONIC 2 to 3 times per week in pigeon's water.
- CARBO, AMINO BUILD & METACHOL 2 to 3 times per week on the pigeon's feed.
- CARBO PLUS & HEALTH OIL once a week on the pigeon's feed.

BREED

»BREEDING

- T-TONIC 2 to 3 times per week in pigeon's water.
- CARBO, AMINO BUILD & METACHOL 2 to 3 times per week on the pigeon's feed.
- CARBO PLUS & HEALTH OIL once a week on the pigeon's feed.

IMPORTANT: In addition to the recommended diet above, growing youngsters still in the nest should be given extra CARBO PLUS & HEALTH OIL 3 times a week on the youngster's feed. The breeding diet should be given to young pigeons for 3 months in row. For sick young pigeons, double the dose of T-TONIC on the feed.

TIMETABLE GUIDE

ABOUT THE PRODUCT CARBO:

In principle CARBO should be given until the pigeons are training well enough or after a difficult race.
 TRAINING: When the pigeons do not train well enough or for less than one hour, additional CARBO should be given.
 RACING: If the pigeons have had a difficult race during the weekend, we advise to give extra CARBO, in combination with AMINO BUILD & METACHOL on the two following days.
 On optional CARBO days, products are highlighted in white and marked with a * on the feeding schedule. (CARBO)*

ABOUT PIGEON HEALTH & PERFORMANCE PRODUCTS

All 'Pigeon Health & Performance' products are best given once a day in the morning when feeding the pigeons.
 RECUP FAST is added to the water immediately upon arrival after the race or after heavy exertion. Additional RECUP FAST can be given on the evening before basketing day. Add the RECUP FAST to the drinking water just after the pigeons have finished training.
 CARBO can be added in the water or on the pigeon's feed! When CARBO is added to the pigeon's feed, it is best combined with METACHOL or HEALTH OIL in order to get the right mixture with the feed.
 CARBO PLUS is only used on the pigeon's feed, together with HEALTH OIL. Use of CARBO PLUS in water is not recommended.
 FINAL SPRINT & FINAL FOND
 FINAL should be given on basketing morning after feeding the pigeons. When the feeding is finished, take away the drinking water for 30 minutes. Then add FINAL to the water and give it to the pigeons for one hour. Afterwards, clear water can be given again.
 AMINO BUILD is given on the pigeon feed in combination with CARBO. Combine with METACHOL or HEALTH OIL in order to get the right mixture with the feed.
 HEALTH OIL is given on the pigeon feed, mostly in combination with CARBO PLUS
 T-TONIC can be given in the water or on the feed.
 METACHOL can be given in the water or on the feed.

- CARBO
- FINAL SPRINT
- FINALFOND
- AMINO BUILD
