

Pigeon Health & Performance Products

Product information
Instructions for use & dosage

- ◆ **Premium** Nutrition Supplements
- ◆ Maintaining **Good Health**
- ◆ Ensuring **Top Performance**
- ◆ Used & Recommended by **Jos Thoné**
- ◆ **Made in Belgium!**

Detailed instructions on how to use Pigeon Health & Performance products on our youtube channel

<http://www.youtube.com/user/pigeonhp>

The screenshot shows the YouTube channel page for 'Pigeon Health & Performance'. The main video player displays a man in a kitchen setting, with the video title 'Jos Thoné and the recovery of pigeons after the race!' and a duration of 0:25 / 1:18. The video description includes 'Pigeon Health & Performance products @ www.pigeonhp.com'. The channel page features a 'Subscribe' button, navigation tabs for 'All', 'Uploads', and 'Favorites', and a sidebar with video recommendations. The sidebar lists four uploads: 'Jos Thoné and the recovery of pigeons after the recovery of pigeons after' (1:18, 1,677 views), 'BARCELONA preparation Jos Thoné' (5:48, 8,755 views), 'Jos Thoné explains how to use CARBO, AMINO' (3:15, 2,909 views), and 'Raceing Champions Series DVD with Louis' (9:52, 10,858 views). There are also two favorites listed: 'Raceing Champions Series DVD with Louis' (10,858 views) and 'Jos Thone Auction December 2010 PIPA' (26,557 views).

FINAL SPRINT

Booster for
PEAK PERFORMANCE

Final boost for the short-distance race!

FINAL SPRINT's unique formula is specially developed for short-distance races and should be administered immediately before basketting.

'FINAL SPRINT' increases energy, endurance and general performance. It stimulates increased activity while robustly suppressing fatigue. It is the most powerful energy supplement for pigeons and will ensure top performance.

Its unique composition ensures the release of additional fats. The resultant intense burning of fat causes an extreme energy boost.

As FINAL SPRINT rapidly increases the pigeon's energy levels, this product is definitely not intended for long distance races and may even have a negative effect on performance, because the pigeon spends a substantially longer time in the basket.

Pigeon Health & Performance strongly advises that only a very small dose of FINAL SPRINT be used at first, as it is a very powerful supplement.

INSTRUCTIONS FOR USE:

Use FINAL SPRINT just before basketting.

Give FINAL SPRINT after feeding the pigeons on the morning of basketting. When feeding is finished, remove drinking water for 30 minutes. Then add FINAL SPRINT to the water and give it to the pigeons for one hour. Afterwards, pure water can be given again.

DOSAGE:

For approx. 20 Pigeons:

Mix 1 level measure of FINAL SPRINT with 0.5 Litre water.

COMPOSITION:

Nutrition:

Dextrose, Maltodextrin, Fructose

Additives per kg:

Vit E, D-alpha-tocopherol: 1333 mg per kg

Vit A (E 672) Retinol: 35667 IU per kg

Analytical components and qualities:

- raw protein: 8.8%
- free fat: 0.0%
- dietary fat: 0.1%
- raw ash: 0%
- sodium: 0.006%
- lysine: 0%
- methionine: 0%

FINAL FOND

Ensures optimal
**ENDURANCE &
PERFORMANCE**
during the race

Differentiating energy for the race, stored in the pigeon's muscles and used during flight!

'FINAL FOND' is a powerful nutritious formula to be given just before a long-distance race to boost the pigeons' endurance, recovery and general performance. The energy is stored in the pigeon's muscles during transport and used during flight!

FINAL FOND's unique formula delivers a sophisticated composition of carbohydrates and proteins, which are essential for delivering fat to the "powerhouse" of cells for extra energy, while ensuring the recovery process is initiated during the race.

In addition, the fat burned causes a snowball effect. An intense burning of fat means first and foremost higher energy production. This extra boost improves the endurance of the pigeon's muscles.

The muscles draw a significant part of their energy from fat. 'FINAL FOND' plays a crucial role in the pigeons' endurance, ensuring those fats provide 80% or even more of the total energy production.

'FINAL FOND' contains all the proteins necessary to support power and speed up recovery after the race.

INSTRUCTIONS FOR USE:

Use FINAL FOND just before basketting.

Give FINAL FOND after feeding the pigeons on the morning of basketting. When feeding is finished, remove drinking water for 30 minutes. Then add FINAL FOND to the water and give it to the pigeons for one hour. Afterwards, pure water can be given again.

DOSAGE:

For approx. 20 Pigeons:
Mix 1 level measure of FINAL FOND with 0.5 Litre water.

COMPOSITION:

Nutrition:
Maltodextrin, Fructose

Analytical components and qualities:

- raw protein: 13.2%
- free fat: 0.3%
- dietary fat: 0.1%
- raw ash: 0.10%
- sodium: 0%
- lysine: 0%
- methionine: 0%

CARBO

The most **COMPLETE** nutritional supplement, **ALL YEAR LONG!**

Let your pigeons fly spontaneously!

'CARBO' is a highly effective supplement that helps improve muscle strength, endurance and efficiency during periods of intense training and competition.

The unique combination of nutrients is the result of years of research. 'CARBO' contains the proteins and minerals necessary to help reduce lactic acid build up in the muscles.

CARBO consists of glucose polymers, which are the best carbohydrates to increase endurance and improve performance. 'CARBO' also provides important nutrients for the metabolism of carbohydrates. The antioxidants in 'CARBO' are vitamin C, vitamin E and vitamin A, which are essential in preventing the reduction of certain muscle groups. The superiority of 'CARBO' is derived from its optimal balance of carbohydrates, electrolytes and anti-catabolic proteins. It contains a perfect blend to replenish depleted reserves.

'CARBO's scientifically developed formula prevents muscle fatigue and muscle catabolism. It serves your pigeons well, all year long.

INSTRUCTIONS FOR USE:

Generally speaking, CARBO is given until the pigeons train well enough for approx. one hour per day.

- during the racing season: 3 times per week
- before & after the racing season: once per week
- during the breeding & moulting season: 3 times per week

DOSAGE:

Mix 1 to 2 level measures of CARBO with 1kg feed or 1 L Water.

Grains can be moistened with METACHOL or HEALTH OIL

COMPOSITION:

Nutrition: Maltodextrin, Fructose, Sodium chloride, Potassium chloride, Magnesium carbonate

Additives per kg: Vitamin E, D-alpha-tocopherol: 1333,3 mg per kg, Vitamin A retinol: 35533 IU per kg

Analytical components and qualities:

- raw protein: 12.0 %
- free fat: 0.0 %
- dietary fat: 0.1%
- raw ash: 0.43%
- sodium: 0.206%
- lysine: 1%
- methionine: 1%

CARBO PLUS

For **OPTIMAL CELL METABOLISM!**

Keep your pigeons in top condition!

'With a focus on performance and the immune system, 'CARBO PLUS' is similar to 'CARBO' with an additional nutritive cell-stimulator.

Its patented structure guarantees an amino-acid absorption rate which is higher than any other nutrition. 'CARBO PLUS' is therefore perfect for performing pigeons, who need more amino acids than are usually obtained from any other regular diet.

Often the pigeons' intestines don't have the ability to extract and absorb sufficient quantities and varieties of amino acids from proteins in their regular daily diet.

Even when they are provided with the very best nutrition, a shortage of amino acids may still occur and all or part of the regenerative processes may come to halt, undermining the pigeons' ability to restore muscles, blood, nerves and immune response fully when training and performing.

'CARBO PLUS' provides several different types of indispensable amino acids to help performing pigeons build and regenerate muscle tissue, enhance endurance and boost immunity. Its unique formula provides these amino acids in a simple form which are completely absorbed by the blood stream within minutes.

INSTRUCTIONS FOR USE:

- All distances: minimum once per week
- For long distances: 2 to 3 times in week before race
- During breeding & moulting season: once per week
- For rearing young in the nest: 3 times per week

DOSAGE:

Mix 1 to 2 level measures of CARBO PLUS with 1kg feed. Grains can be moistened with HEALTH OIL. Contains blood products. May not be fed to ruminants.

COMPOSITION:

Nutrition: Maltodextrin, Fructose, Haemoglobin, Potassium chloride, Magnesium carbonate

Additives per kg: Vitamin E, D-alpha-tocopherol: 1333,33 mg per kg, Vitamine A retinol 35533 I.U per kg

Analytical components and qualities:

- raw protein: 12.6%
- free fat: 0%
- dietary fat: 0.1%
- raw ash: 0.18%
- sodium: 0.006%
- lysine: 1%
- methionine: 1%

RECUP FAST

Because a FAST RECOVERY is essential!

Are your pigeons exhausted on arrival after the race?

With 'RECUP FAST' they will be fit again in no time! 'RECUP FAST' contains a revolutionary blend of proteins, which are accessed when glycogen reserves are depleted. 'RECUP FAST' immediately restores vital reserves, stimulates the development of ultra-strong muscles and maximizes performance.

This well balanced formula helps pigeons:

- improve protein synthesis
- reduce muscle waste
- maximize performance

The high quality proteins in RECUP FAST are absorbed very quickly by the pigeon's muscles. Of all high-quality proteins almost 70% immediately penetrate the muscle tissue. These proteins also reduce catabolism in the muscles, which is an important benefit during a long-distance race.

The unique formula of 'RECUP FAST' contains a maximum amount of carbohydrates in order to improve performance during the competition season. It accelerates the restoration of muscle tissue and restores the nitrogen balance.

'RECUP FAST' is the most complete solution to be used after an intense flight in order to ensure the sustained, rapid recovery of your racing pigeons.

INSTRUCTIONS FOR USE:

- immediately upon arrival after the race
- after heavy exertion or during recovery
- after the last training, the day before basketting

DOSAGE:

For approx. 20 Pigeons:

Mix 2 to 3 level measures of RECUP FAST with 1 Litre water (depending on intensity of race or training)

Shake well to obtain a good mixture with water!

COMPOSITION:

Nutrition:

Dextrose, Maltodextrin, Fructose, Magnesium carbonate, Sodium chloride, Potassium chloride, Sodium bicarbonate.

Analytical components and qualities:

- raw protein: 13.8%
- free fat: 0.0%
- dietary fat: 0.1%
- raw ash: 0.28%
- sodium: 0.0879%
- lysine: 0%
- methionine: 0%

AMINO BUILD

For a **FAST** and **MAXIMAL** absorption of amino acids!

Essential building blocks for your pigeons!

'AMINO BUILD', a very effective concentrate of amino acids, is ready to use, works fast and is easy to digest.

'AMINO BUILD' delivers the necessary energy, contributes to a **faster absorption** of amino acids and also contains vitamin B, which is critical to ensure the **maximum absorption** of amino acids.

It is composed of all essential and many non-essential amino acids coming from high-quality proteins, BCAAs (L-leucine, L-isoleucine and L-valine) and carbohydrates from fructose.

'AMINO BUILD' not only increases muscle strength and bone structure, but also ensures faster recovery after training or racing.

INSTRUCTIONS FOR USE:

Use AMINO BUILD:

- during the racing season: 1 to 3 times per week
- during the breeding & moulting season: 2 to 3 times per week

DOSAGE:

Mix 1 level measure of AMINO BUILD with 1kg feed.

Grains can be moistened with METACHOL or HEALTH OIL

COMPOSITION:

Nutrition:

Collagen, Fructose

Analytical components and qualities:

- raw protein (NX6): 78%
- free fat: 0.2%
- dietary fat: 0.1%
- raw ash: 0.39%
- sodium: 0.14%
- lysine: 2.66%
- methionine: 0.14%

HEALTH OIL

The most EFFECTIVE oil blend!

For all-round maintenance and support of the immune system!

'HEALTH OIL' provides high energy without immediately storing extra fat.

HEALTH OIL is a special oil with middle chain triglycerides, which are very valuable for energy.

When the glycogen reserves of the muscles and liver are used up during training, HEALTH OIL ensures there is still enough energy available. The fats are broken down and converted into energy. HEALTH OIL prevents muscle reduction and provides long-lasting energy.

The Omega 3-6-9 polyunsaturated fatty acids become an unlimited source of energy for the racing pigeon. They contain essential oils and nutrients, which are crucial for performing various biological functions. Moreover, these fatty acids provide several benefits like healthy immune system, enhanced energy, and help in maintaining healthy and deep pink skin colour of the pigeon.

HEALTH OIL has the added bonus of burning fat faster and improving the absorption of amino acids and minerals. It is perfect for ensuring increased resistance and protection against harmful bacteria and fungi.

INSTRUCTIONS FOR USE:

Use HEALTH OIL:

- during the racing season: 1 to 2 times per week
- during the breeding & moulting season: once per week
- when rearing young in the nest: 3 times per week

DOSAGE:

Mix 1 measure spoon of HEALTH OIL with 1kg feed.

HEALTH OIL is ideal for use in combination with CARBO PLUS, mixed with the pigeons' feed to moisten the grains and ensure an optimal blend of nutrients.

COMPOSITION:

Nutrition:

Coconut oil, Wheat germ oil, Fish oil.

Analytical components and qualities:

- free fat: 97.3%
- raw ash: 0%
- sodium: 0.006%
- lysine: 0%
- methionine: 0%

T-TONIC

Natural RESISTANCE & ENERGY stimulator

T-TONIC is a catalyst for your pigeons and will significantly improve pigeon activity.

The unique components of 'T-TONIC' increase the absorption and exchange of important nutrients between cells.

This exchange gives the pigeon the necessary basis for a good performance. Regular use of 'T-TONIC' will increase energy reserves and therefore reduce temporary fatigue.

The active ingredient of Oregano and other herbs in T-TONIC help digestion, thus preventing the development of illnesses caused by undigested food. The blend of natural and powerful conditioning oils cleanse and replenish the pigeons guts and help strengthen the immune system. The oil is anti-microbial, antiseptic and antiviral! It boosts the pigeon's immune system and strengthens the whole body of the pigeon

During the racing season, T-TONIC reduces stress caused by prolonged stays in the basket before flight, while maintaining the dynamics at competitive levels.

T-TONIC significantly enhances the metabolism for your pigeons and leads to optimum performance.

INSTRUCTIONS FOR USE:

Use T-TONIC:

- On racing pigeons: 1 to 2 times per week
- On widows, youngsters & moulting pigeons: 3 times per week

DOSAGE:

Mix 1 measure spoon of T-TONIC with 1 L water or 0.5kg feed.

COMPOSITION:

Nutrition:

Fish oil, Sodium Chloride

Trace elements per L: 62 mg iron

Additives per L: ascorbic acid 5.500 mg

Additive: potassium sorbate

Analytical components and qualities:

- raw protein: 0%
- free fat: 1%
- raw fibre 0%
- raw ash: 0.2%
- water 95%

METACHOL

For a good digestive system & **HEALTHY FEATHERS!**

METACHOL

METACHOL has a significant general impact on your pigeons' digestive systems.

METACHOL simultaneously stimulates liver and kidney functions, producing a well-functioning metabolism and improving the overall condition of your pigeons.

METACHOL contains methionine, an essential amino acid that is critical for the joint and growth of the feathers.

METACHOL is of great value both before the flight or as a treatment after a heavy flight.

INSTRUCTIONS FOR USE:

Use METACHOL:

- racing pigeons: 1 to 2 times per week
- widows, youngsters & moulting pigeons: 3 times per week

DOSAGE:

Mix 1 measure spoon of METACHOL with 1L water or 1kg feed.

METACHOL is ideal to moisten the grains in combination with CARBO and AMINO BUILD to ensure an optimal blend of nutrients.

COMPOSITION:

Nutrition: Fructose, Sorbitol

Additives per L.: Vitamin B2 150 mg, Vitamin B12 10 mg, Biotin 5 mg, Choline 70.000 mg.

Analytical components and qualities:

- raw protein: 0.1%
- free fat: 0%
- raw fibre 0%
- raw ash: 0%
- sodium: 0%
- lysine: 0%
- methionine: 1%
- water 70%
