THONÉ PIGEONS

BREEDING CATALOGUE 2023 / 24

Breeding is the foundation for success.

We are very pleased to present our latest breeding catalogue. This catalogue guides the reader through a range of our breeding pigeons as well as some insights into the Thoné system. The foundation for the quality of our pigeons lies in true craftsmanship and a strict selection starting in the breeding loft, followed by an excellent balance in terms of caretaking.

We are very happy with our achievements this season, especially winning the title of 1st Provincial Champion overall KBDB as well as 5th National Champion KBDB 2023. We think it is acceptable to say that Jos Thoné has proven once again that he is a true all-round pigeon fancier, adapting his methods to the evolving sport of pigeon racing.

Year after year, our bloodlines' quality is evidenced by many top references from all over the world. We would like to congratulate all our fans and supporters with their fantastic results in recent years. These strong references are proof for the supreme quality of our pigeons, especially in the One Loft Races where our pigeons are regularly outperforming.

Jos pays a lot of attention to his breeders' ancestries. The pigeons either need to be champions, or they must descend from champions before they get a place in his breeding loft. But also, the handling of the pigeon needs to be 100% to his personal satisfaction. But there is still one essential point: the best pigeon does never guarantee a winning position. The real challenge lies in selecting the right pigeon for the right race, at the right time.

Jos is just as motivated and passionate about pigeon racing as in his early days and is now passing his love for pigeons on to his sons, Maxim (1994) and Xavier (1989).

THE BREEDING LOFT

Quality from the base

The breeding birds in our stock loft can be related to four main bloodlines. The short distance pigeons are typically related to 'Avril'. Other icons of the speed lineage are 'Cavendish', 'Kajo' and 'Sua'. The middle to heavy middle-distance lineage is primarily related to 'Sachi' (1. Fast. Nat. La Souterraine) and 'Nina' (1. Fast. Nat. Bourges) who has recently joined the breeding loft. Only 2 years after her national victory, a direct son from 'Nina' wins 1. Nat. c. Bourges (492 km) 2,327 old birds. This supreme cock was bred from 'Nina' with 'Remco', during the time that they were together in the racing team. Remarkably, 'Nina' won 1. Nat. Bourges with tailwind and her son wins 1. Nat. Bourges zone with heavy headwind. We have noticed the same trend in her breeding records. Her children as well as the children from her siblings can win in all circumstances. We love to see that in our pigeons. The 'Nina' family is also performing very well in the One Loft Races. Other champions in the (heavy) middle-distance category are 'Oliver', 'Figo James' and 'Billy'. Furthermore, the descendants from Golden Pair 'Dwain' x 'Kirin' have already given a massive amount of first prize winners including 'Nino' 1. Fast. Nat. Argenton 2022 (son 'Avicii') as well as 'La Grande Étoile' 1. Nat. Marseille FR 2023.

Jos has always paired speed x distance pigeons to create fast pigeons without neglecting the strength factor. This philosophy has created a unique type of all-round short-to middle distance pigeon, which can win from 100 - 600 km. A perfect example of this successful breeding strategy is 'Candira', 11x 1. prize from speed to middle distance and 3. Belgian Olympic Hope KBDB all-round bird in 2020.

'Sedna' (1. Int. Narbonne) is still the main bloodline in the long-distance category. Champions coming from 'Sedna' such as 'Gaggan' (2x 1. Nat. zone) or 'Apollo' (father 'Babe' 1. Prov. Acebird KBDB speed) are proving themselves as top breeders in the stock loft. Sedna's descendants are winning around the globe from 100 to 1000 km under the most difficult conditions.

The pure marathon lineage is based on the well-known hen 'Poco Diego' (won 1. Int. Barcelona in 1993 and 1. Nat. Barcelona in 1995) or the line of the favorite pigeon of Jos Thoné at the time in the lofts of Thomas Peeters, namely 'Diego Armando Barcelona'.

Finally, the lineage of the legendary 'Gouden Grijze' (anno 1965) is still dominating the pedigrees of the extreme long-distance pigeons. She is probably the most famous grizzle pigeon ever raced and ancestor to 'Crow'. Mostly all top-class, grizzle, long-distance birds in the world have 'Gouden Grijze' blood running through their veins!

THE THONÉ SYSTEM

As a true all-round fancier - with the goal to win at all distances - Jos needs an all-round and versatile mixture that is adapted to his racing system. Additionally, he wants to use it during moulting and breeding season.

In a nutshell: **Beyers Premium Thoné Olympic** is that true all-round and versatile mixture that Thoné uses all-year round for all pigeons. During specific seasons a limited quantity of other mixtures such as extra carbohydrates and fats during racing (*Galaxy Sport Energy* and *Galaxy Long Distance TT*) can be added to the Thoné Olympic mixture.

"Beyers Premium Thoné Olympic"
All year round, for all pigeons!

Finding the perfect combination between pigeon feed and nutrition supplements is part of every pigeon fanciers' quest to win the races. To keep his pigeons healthy and to maintain their condition at optimum level, Jos follows the complete program of **Pigeon Health & Performance (PigeonHP)**.

A fundamental pillar of the Thoné racing philosophy is simplicity. Jos discovered that he needed only a few specific products to get his pigeons to perform at the highest-level year after year. Therefore, the PigeonHP product range only consists of app. 10 complementary products which will provide the right nutrients to all pigeons all-year round.

"Once you have found the right mix of products, you'll have to learn to give the right amount at exactly the right time." - Jos Thoné
